TESTIMONIALS

BRANDEN IREIFEJ, MD
Rheumatology Fellow
University of Southern California

"I would not be where I am today without the support of AUA and their professors. The foundation I developed in Antigua for thinking critically has shaped me for who I am today. I am forever grateful for the experiences AUA has taught me and will always carry it with me during my medical career."

TANI MALHOTRA, MD
Clinical Fellow
MetroHealth Medical Center

"AUA was the most feasible option for me as it allowed me to be in a family friendly culture that I was familiar with. The coursework I did at AUA prepared me really well for my clinical rotations in the United States. In fact, I felt like I came into my residency much more prepared than most of my peers. They made sure we stayed on top on everything we needed to know."
